HARVARD T.H. CHAN SCHOOL OF PUBLIC HEALTH

Kiosk

July 27, 2017

Every little bit counts

Gaining weight, even modest amounts, over the course of early and middle adulthood may increase health risks later in life.

Labor management

The way certain hospital labor and delivery units are managed may put healthy women at greater risk for C-sections and surgical complications.

Eat better, live longer

People who improve the quality of their diets over time may significantly reduce their risk of premature death.

Around the School

Socioeconomic inequalities in childhood undernutrition

Event Highlights

Hot Topics: Evaluating Reproductive Outcomes in HIV and Environmental Research Studies

August 1
12:30-1:30 PM
Kresge G2

Event calendar >

Listen: Changing the language of education

In this week's podcast: How the words we use to describe addiction can affect the treatment people receive—and why changing language is critical to reducing the stigma surrounding substance use disorders.

In the news

After disaster, social ties may help elderly stave off cognitive decline

Obamacare in good standing with American public

Cold brew coffee as healthy as the hot kind

Health market uncertainties loom for insurers

Not all plant-based diets are healthy

persist

There are substantial inequalities in childhood undernutrition in developing countries and these inequalities have persisted or even increased over the past 25 years.

Harvard Chan keeps cool at annual Scoopfest

Ice cream enthusiasts packed into the Kresge Cafeteria on July 19 to enjoy sundaes at the annual Scoopfest. School deans, senior leaders, and faculty scooped ice cream for students, faculty, and staff looking to beat the heat. Hula hoops, cornhole games, and touches of summertime fun dotted the scene. View more photos from Scoopfest here.

Madina Agénor participates in HIV research program

Madina Agénor was one of eight junior faculty from around the country who participated this summer in an intensive four-week program at Yale University aimed at advancing HIV/AIDS research by underrepresented minority academics.

Poll: Obamacare repeal unpopular—but other issues may sway 2018 voters

Counseling often inadequate for women with unintended pregnancies
