

The School of Medicine and the Center for Applied Statistics at the Washington University in St. Louis invite applications for a post-doctoral position in statistics. This position will support the Bioinformatics Core of the NCI-supported Transdisciplinary Research in Energetics and Cancer (TREC) grant by providing: data management, data analysis, model specification, computational-based estimation, and model fit analysis, all focusing on Bayesian hierarchical modeling of health data. This work will involve extensive use of Markov chain Monte Carlo and related tools.

This position may be held for two years with one additional year by mutual consent. Qualified candidates will possess a Ph.D in statistics, biostatistics, or the equivalent, with good communication, interpersonal, and organizational skills. The position is available immediately, but the start date is negotiable. Applications will be processed as they arrive and the position will remain open until filled. Candidates should submit a CV, a letter of application, and arrange for at least three letters of reference to be sent directly to: Sue Tuhro, Washington University in St. Louis, Danforth Campus, One Brookings Drive, Campus Box 1203, St. Louis, Missouri 63130-4899. We especially encourage applications from women and members of underrepresented minority groups. Washington University in St. Louis is an equal opportunity employer. Employment eligibility verification required upon hire.
