

**Siteman Cancer Center**

**Barnes-Jewish Hospital. Washington University School of Medicine**

**A National Cancer Institute Comprehensive Cancer Center**

**POSTDOCTORAL FELLOW POSITIONS.** Washington University School of Medicine and the Alvin J. Siteman Cancer Center, a National Cancer Institute-designated Comprehensive Cancer Center, are seeking applications for postdoctoral fellowships in Energetics and Cancer. Fellows will have the opportunity to work with a transdisciplinary team of investigators who lead ongoing studies to understand energy balance at molecular, cellular, organismal, and populations levels as it relates to cancer prevention. Applicants should have training in behavioral science, epidemiology, biostatistics, environmental health, physiology and metabolism, sociology, communications, geography, genetics, psychology, kinesiology, nutrition, biochemistry, molecular biology, oncologic research, clinical oncology, or other relevant discipline. Investigators should have interest in developing new studies that bridge from basic science and animal studies to epidemiologic investigations or behavioral interventions to broader clinical and population level applications. Investigators committed to further transdisciplinary research in cancer will be given highest priority. Candidates must have a strong record or outstanding promise of scholarly achievement.

Salary is competitive and commensurate with experience. Washington University offers excellent benefits. The position offers the opportunity to collaborate with clinicians, pathologists, geneticists, imaging scientists, epidemiologists, social and behavioral scientists, and other faculty members on the academic and medical campuses of Washington University and the George Warren Brown School of Social Work. A strong mentoring and career development program is in place.

The Prevention and Control program is one of eight research programs of the rapidly growing Siteman Cancer Center. This program brings together more than 50 investigators who are studying the relations among biological, genetic, psychological, and epidemiological factors. Studies range from genetic investigations to clinical outcomes and community-based research. This environment is rich in exciting opportunities to develop multidisciplinary and transdisciplinary collaborations. The Prevention and Control program is also closely integrated with the Division of Public Health Sciences in the School of Medicine's Department of Surgery led by Dr. Colditz.

To apply, send cover letter, curriculum vitae and professional reference list by email to:

[leightonc@wudosis.wustl.edu](mailto:leightonc@wudosis.wustl.edu) or mail documents to: **Graham A. Colditz MD, DrPH, Associate Director, Prevention and Control, Alvin J. Siteman Cancer Center, 660 S. Euclid Avenue, Campus Box 8109, St. Louis, MO 63110.** Applications will be accepted until the position is filled.

More information about the Prevention and Control Program of the Siteman Cancer Center can be found on the Internet at [www.siteman.wustl.edu](http://www.siteman.wustl.edu).
