

The Program for Patient Safety & Quality at Children's Hospital Boston is seeking a Biostatistician I to support the Standardized Clinical Assessment and Management Plans (SCAMPs) Initiative. Primary job functions will include the design and production of recurring analytical reports, supplying biostatistical expertise to the design of study forms and databases, assistance with manuscript preparation, analysis of hospital and claims data, and providing programming support for the development of novel statistical methods. Must have demonstrated proficiency with using SAS for statistical analysis. Experience with Proc Print, Proc Report, ODS and SAS macro language a plus. Must have high attention to detail, be able to communicate effectively both orally and in writing, and must enjoy working in teams. Previous experience in healthcare and an understanding of medical terminology a plus. Work requires knowledge of statistical methods typically acquired through completion of a Master's degree in biostatistics, epidemiology, or a closely related field. To apply click on the "Careers" link at the top of the Children's Hospital Boston webpage and search for AutoReqId #: 25583.
