

Harvard Training Program in Oral Epidemiology

The Training Program in Oral Epidemiology provides research training in epidemiology and the application of these methods to the study of oral diseases and the effect of dental services and health policy on oral health status. The program is jointly offered between the Harvard School of Dental Medicine and the Harvard School of Public Health.

The training program has four major focus areas:

- Molecular epidemiology of oral diseases
- Epidemiology of oral and systemic diseases
- Evidence-based dentistry
- International oral health systems

Financial Support

Citizens or permanent residents of the United States are eligible for the Oral Epidemiology Training Grant funded by the National Institute of Dental and Craniofacial Research. Limited support may also be available from the James M. Dunning teaching and research fund.

Eligibility Requirements

Doctoral Degree

- Dentists or physicians
- Students holding a bachelor's or master's degree

Masters Degree

- Dentists or physicians who seek a two year mid-career research training, including a one-year MS or MPH

Short-term Training

- Mid-career dentists or physicians who seek a three-month summer research experience
- Pre-doctoral dental students who seek a three-month summer research experience.

Graduates from the doctoral program will receive one of three degrees, ScD or DrPH from Harvard School of Public Health or DMSc from Harvard Medical School and Harvard School of Dental Medicine. Doctoral candidates can also simultaneously obtain a certificate in Dental Public Health.

Applications

Interested applicants must apply to both the Harvard School of Dental Medicine and the Harvard School of Public Health. Application material can be downloaded from the following websites:

HSDM application: www.hsdm.harvard.edu HSPH application:
