

Company: Northwestern University

Full / Associate / Assistant Professor at Non-tenure track

The Biostatistical Collaboration Center in the Department of Preventive Medicine of Northwestern University Feinberg School of Medicine seeks TWO highly qualified applicants in Biostatistics to provide biostatistical support in biomedical research. This involves collaboration and consultation with investigators on a broad range of research design and biostatistical aspects related to their projects. There will be protected time for independent research if so desired. There may be needs to teach basic biostatistics to medical investigators. The position is full-time non-tenure track at the professor, associate professor, or experienced assistant professor level with the expertise in clinical research. Applicants must have a doctorate degree in Biostatistics or Statistics. Good communication skills and the ability to work as part of a multidisciplinary team are essential. Primary academic appointment would be in the Department of Preventive Medicine. Salary is negotiable. Applications will be reviewed till the position is filled. Northwestern University is an Affirmative Action/Equal Opportunity Employer. Hiring is contingent upon eligibility to work in the United States. Women and Minorities are encouraged to apply.

To apply, send a letter of interest (include a list of three references) and CV to:
