

**Position Available**  
Department of Epidemiology  
Harvard School of Public Health

**Post-Doctoral Research Fellow**

The Program on Causal Inference in Epidemiology at the Harvard School of Public Health invites applications for a post-doctoral research fellow position. The research fellow will work on the application and development of statistical methods for the analysis of complex longitudinal data, with a special emphasis on

- structural models for estimating the effect of dynamic treatment regimes
- comparison of different approaches for the determination of the optimal treatment regime
- applications to a multinational collaboration of cohorts of HIV-infected individuals from Europe and North America

A PhD in epidemiology, statistics, mathematics, or a related quantitative field is required. The ideal candidate will have excellent technical and writing skills, expert knowledge of the SAS language, and an ability to collaborate with colleagues within and beyond the group.

Interested candidates should send CV, letter of research interests, and two reference letters to:
