

# Green Tip of the Month

## Composting at Longwood

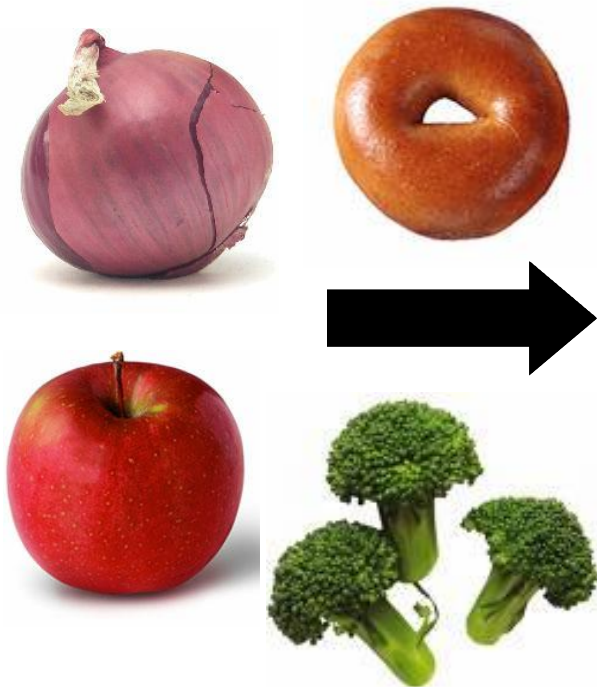

Photo credit: Kessner Photography

Did you know that Elements Café, Courtyard Café, and Sebastian's Cafe all compost their pre-consumer kitchen waste?

### WHY COMPOST?

This new program reduces waste, costs less, and is good for the environment. Instead of being shipped to a landfill, the waste goes to a farm in Saugus and becomes nutrient rich, organic soil, which can be used instead of chemical fertilizers to naturally enrich the soil.

### Want to compost at home?

Compost bins are often sold at a discount by many Mass. municipalities. Apartment dwellers can get a worm compost bin and compost indoors!
