Progress Update Presentations

For your progress update presentations (see “Fellows to Present” in schedule above) please create a short (~7 slide maximum) slide-deck to share with the group for your progress update.

Fellows will have between 10-15min to present (depending upon how many fellows are presenting on that date). This includes Q&A and any feedback following your presentation.

Please touch on the following points:

1. Introduce yourself.
2. Brief overview of your project (what you are doing and why).
3. Progress to date (those who are presenting in the first 2-3 seminars may not have much to report, so you should focus on point 4 below).
4. Upcoming plans and goals you want to accomplish within the next few months.
5. Challenges encountered.
6. Successes and/or questions or requests for feedback from the group.
