

Health Professionals Follow-Up Study

Dear Colleague,

Thank you for your longstanding participation in the Health Professionals Follow-Up Study. As you know, we are studying the determinants of long-term survival from prostate cancer. Through this study, we are gaining valuable insight about how diet and other factors can improve prognosis. Please note that we have all of your original diagnosis information. The purpose of this mailing, as we do every couple of years, is to obtain new follow-up information regarding your prostate cancer. Even if nothing has changed, that information is still important to our study.

We would greatly appreciate it if you could complete the enclosed questionnaire regarding your prostate cancer and return it to us in the envelope provided. We realize this is a lengthy questionnaire; please fill out whatever you can. Please also sign and date the medical release form below and provide us with the name and address of your current physician whom you see for follow-up/treatment of your prostate cancer.

Your participation is completely voluntary, and if you do not wish to participate in this study on prostate cancer survival, you will still be a valuable member of the Health Professionals Follow-Up Study. By participating, you will be making a key contribution to our understanding of prostate cancer, which may ultimately lead to strategies geared at prevention or cure. Please do not hesitate to call me or Dr. Edward Giovannucci at 617-384-8663 if you have any questions about the study.

Sincerely Yours,

3/8" PERF

Walter Willett

Walter Willett, MD, DrPH Professor of Nutrition and Epidemiology Harvard School of Public Health

Please Complete Below and Return with Questionnaire

PLEASE SEE BACK FOR HIPAA AUTHORIZATION INFORMATION

I hereby grant permission to my physician (named below - please give the name and address) to answer questions regarding my prostate cancer diagnosis and continued treatment and release this information to Walter C. Willett, MD, Professor of Nutrition and Epidemiology, Harvard School of Public Health, 677 Huntington Ave, Boston, MA 02115. I also grant permission for Walter C. Willett, MD to review my medical records. All information will be kept strictly confidential.

SIGNED:	DATE:
PRINT NAME:	BIRTH DATE:
PHYSICIAN'S NAME:	
PHYSICIAN'S ADDRESS:	
	STATE: ZIP:

PLEASE USE AN ORDINARY NO. 2 PENCIL TO ANSWER ALL QUESTIONS.

Fill in the appropriate response circles completely, or write the requested information in the boxes provided. The form is designed to be read by optical-scanning equipment, so it is important that you make <u>NO STRAY MARKS</u> and keep any write-in responses within the spaces provided. Should you need to change a response, erase the incorrect mark completely. If you have comments, please write them on a separate piece of paper.

Details Regarding Your Participation:

Your prompt reply is helpful and greatly appreciated. As always, your answers will be kept strictly confidential and will be combined with other participants' responses for medical statistical purposes. Also, the samples of blood, toenails, tissue or urine that many of you have provided are sometimes analyzed for markers in laboratories outside of Harvard; in such cases we use a separate ID number to ensure confidentiality. If findings from these samples could be useful clinically, they could provide the basis for commercially available tests. However, under no circumstances would members of our research team personally profit from these samples. You may withdraw your sample at any time to the extent the data derived from them have not yet been aggregated.

This release will be valid until the hospital or doctor has fully responded to Harvard's request for medical records. You understand that once the hospital or doctor shares your health information with the researchers, it may no longer be protected by the HIPAA Privacy Rule and there is the potential for your protected health information to be redisclosed by Harvard. The researchers have taken many measures to protect the confidentiality of your health information. One of which is that the researchers have obtained a Certificate of Confidentiality from the Department of Health and Human Services, which gives heightened protection against the researcher being compelled to disclose your confidential information.

PERF

You may refuse to sign this release for any reason. You may withdraw this release at any time and for any reason. Refusing to sign or withdrawing your release will not affect the care you receive from the Hospital or doctor in any way. If you wish to withdraw this release, you must contact the Office of Human Research Administration at 617-432-2143 (local calls) or 866-606-0573 (long distance calls). The hospital or doctor may rely on this release in the meantime. You may withdraw your authorization to the extent that data have not yet been aggregated.

The research team has great respect for your continued study participation, and therefore would like to remind you of several important points, as is standard practice in research. We do so in recognition of the fact that consent is an ongoing process rather than a one-time agreement. Please do not hesitate to contact us if you have any questions regarding this information.

- **a.** You are participating in a research study that focuses on how to decrease the risk of prostate cancer in men. Participation involves the completion of questionnaires.
- **b.** Your participation is voluntary. Refusal to participate will involve no penalty or loss of benefits to which you are otherwise entitled.
- **c.** There is a small risk of breach of confidentiality; however we have taken many steps to minimize this risk.
- **d.** Samples are sometimes shared with entities outside of Harvard as part of research collaborations; in such cases we use a separate ID number to ensure confidentiality.
- e. You will not receive monetary compensation for participating.
- f. There are no direct benefits to you from study participation.
- **g.** If you wish to speak with someone not directly involved in this research study about your rights as a research participant, please contact the Harvard School of Public Health's Office for Human Research Administration at 617-432-2143 (local calls) or 866-606-0573 (long distance calls), or at: <u>ohra@hsph.harvard.edu</u>.
- **h.** If you have any questions regarding the study itself, please call the study research coordinator, Lauren McLaughlin, at 617-384-8663.

Health Professionals Follow-Up Study

6. How big a problem, if any, has each of the following been for you DURING THE LAST 4 WEEKS?

	No problem	Very small problem	Small problem	Moderate problem	Big problem
a. Urgency to have a bowel movement	0	0	0	0	0
b. Increased frequency of bowel movements	0	0	0	0	0
c. Losing control of your stools	0	0	0	0	0
d. Bloody stools	0	0	0	0	0
e. Abdominal/pelvic/rectal pain	0	0	0	0	0

2

7. Overall, how big a problem have your bowel habits been for you DURING THE LAST 4 WEEKS? (Please select only one)

- O No problem
- Very small problem
- O Small problem
- O Moderate problem
- O Big problem

SEXUAL FUNCTION

This section is about your sexual function and satisfaction. Many of the questions are very personal, but they will help us understand the important issues that you face every day. Remember, your answers to this questionnaire will be kept confidential and will be used only for research purposes.

Please consider your function over THE LAST 4 WEEKS ONLY. Please answer even if you are using medications or devices, or are not currently sexually active.

8. How would you rate each of the following DURING THE LAST 4 WEEKS?

		Very good	Good	Fair	Poor	Very poor to none	Not applicable
a.	Your ability to have an erection?	0	0	0	0	0	0
b.	Your ability to reach orgasm (climax)?	0	0	0	0	0	0

9. How would you describe the usual QUALITY of your erections DURING THE LAST 4 WEEKS? (Please select only one)

- Firm enough for intercourse
- Firm enough for masturbation and foreplay only
- Not firm enough for any sexual activity
- 🔵 None at all
- Not applicable

10. How would you describe the FREQUENCY of your erections DURING THE LAST 4 WEEKS? (Please select only one)

- O I had an erection WHENEVER I wanted one
- O I had an erection MORETHAN HALF the time I wanted one
- I had an erection ABOUT HALF the time I wanted one
- O I had an erection LESSTHAN HALF the time I wanted one
- O I NEVER had an erection when I wanted one during the last 4 weeks
- Not applicable
