BIOGRAPHIES

SHORT BIOGRAPHY

Shruthi Mahalingaiah is an assistant professor of environmental, reproductive, and women's health at the [Harvard T.H. Chan School of Public Health](#). She serves clinically as a physician at the [Massachusetts General Hospital](#) in the Department of Obstetrics and Gynecology, where she specializes in ovulation disorders, reproductive endocrinology, and infertility. Her research seeks to understand the links between environmental and modifiable risk factors on human reproduction and gynecological diseases. Shruthi is the creator of the Ovulation and Menstruation Health (OM) Study and one of the principal investigators of the [Apple Women's Health Study](#).

LONG BIOGRAPHY

Shruthi Mahalingaiah is an assistant professor of environmental, reproductive, and women's health in the Department of Environmental Health at the [Harvard T.H. Chan School of Public Health](#). She serves clinically as a physician specializing in ovulation disorders, reproductive endocrinology and infertility at the [Massachusetts General Hospital](#) in the Department of Obstetrics and Gynecology. Shruthi has a BA from Middlebury College, where she dual majored in chemistry/Spanish and dual minored in physics/dance. Supported by a Thomas J. Watson III Fellowship, she lived with indigenous shamans in the Ecuadorian Amazon Basin, Andes mountains, and Bali studying the role of ritual in the healing process before matriculating to medical school. She attended Harvard Medical School and an OB/GYN residency and fellowship in reproductive endocrinology and infertility at Mass General Brigham. She joined the faculty at Boston University School of Medicine/Boston Medical Center in 2011 with K level funding from the Building Interdisciplinary Research Careers in Women's Health (BIRCWH 2011–2014) and the Reproductive Scientist Development Program (RSDP 2014–2017) to study environmental exposures and incidence of benign gynecologic conditions. She received a Master of Science in epidemiology at Boston University School of Public Health in 2015. She was awarded the 2016 Endocrine Society Early Investigator award, an Ellison Family Foundation award, and an RSDP seed grant in 2017–2018 to create a pilot online study of ovulation and menstruation health.

BRIEF RESUME

WORK EXPERIENCE
