

Nutrition and Global Health Internship Opportunity

Project Title: Secondary qualitative data analysis on acute malnutrition in young children

Duration: 2-3 months

Preferred Student Level: Doctoral

Qualifications Desired: Data management and advanced quantitative statistical analysis

Compensation: Monthly stipend

Responsibilities: The student will develop a statistical analysis plan with the faculty mentor and will be responsible for executing the quantitative statistical analysis. Secondary data will be provided by the faculty mentor from a completed study conducted in Niger among young children with severe acute malnutrition. The student will learn how to develop a formal statistical analysis plan, gain experience with quantitative analysis, and time allowing contribute to manuscript preparation for peer reviewed publication.
