

Nutrition and Global Health Concentration

Program Requirements

Students will be responsible for fulfilling the masters or doctoral degree requirements of their respective departments, in addition to the requirements of the Concentration. *Nutrition and Global Health* students will be required to complete **6.25 core course credits** and are encouraged to take at least 5 elective credits in courses suited to their specific interests. The Concentration convenes monthly Work-in-Progress meetings for students to receive feedback on their research. Students should attend all Work-in-Progress meetings and are required to present at one meeting. In addition, there is a master's thesis/doctoral paper requirement for the concentration.
