Fall 2021 Cross-Registration Harvard Chan Student Evaluation Feedback

Fall 2021 Cross-Registration Comments

Faculty of Arts and Sciences (FAS)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	STAT 185: Intro to Unsup. Learning	Young, Alex	I found this class 100% worth making the commute to Cambridge. Great balance of theory and application/coding. Definitely not an easy course, but the work you put in will translate to a lot of learning.	1
2021 Fall	APCOMP 207: Systems Development	Wermelinger, Fabian	Great course to learn software engineering if you don't have a formal CS background. Provides must have skills in your data science toolkit	2
2021 Fall	APCOMP 215: Adv Practical Data Science	Protopapas, Pavlos	Great start to learning about MLOps and will help you expand from a data scientist to someone who understands more about development, deployment and infrastructure	2

2021 Fall	COMPSCI 109A: Data Science 1	Protopapas, Pavlos	Good intro to DS. Comprehensive and detailed. THE course to take if you are new to ML and Python in ML.	4
-----------	------------------------------	--------------------	--	---

Harvard Divinity School (HDS)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	HDS 2067: Climate of Uncertainty	Moore, Diane	I'm not sure this course will be offered again...It provided a valuable and different perspective on climate change discussions. I enjoyed learning from classmates in other schools, with other interests. I also enjoyed the opportunity to develop my own self-directed project.	1

Harvard Graduate School of Education (HGSE)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	EDU H250: Developmental Psychology	Harris, Paul Lansley	Great class! Very important basic information that I learned from it. I think it is important to be taken by anyone who is interested in education or child development. The information learned is essential for future classes.	1
2021 Fall	EDU S043: Multilevel and Longitudinal Mo	Miratrix, Luke Weisman	If you really want to learn statistics, take this class. Pedagogically much stronger than other stats courses I've taken at HSPH. There is a lot of content thrown at you, but learning how to navigate what makes sense to focus on given the time you have will best enhance your learning. Will also be helpful if you know R. Great content, and I was really happy to have to learn R because it turned out to be my new favorite statistical package! Felt a bit loosey-goosey and disorganized at times, but to be fair, it was COVID Time and the prof had a lot going on with regard to COVID-related things outside of class. I think this would be better-organized in Normal Times.	2

Harvard Kennedy School (HKS)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	MLD 102: Getting Things Done: Managemen	Andrews,Matt R.	Great course if you are thinking of working in the implementation space, and are looking for the "how" to implement policy effectively.	1
2021 Fall	DPI 122: Politics and American Public P	King,David	Fantastic crash course on American politics and how value and teams are formed. King is an engaging lecturer and caring mentor. A key part of the class is getting out and about on a campaign. Great hands on experience!	1
2021 Fall	API 222: Machine Learning and Big Data	Saghafian,Soroush	Great course connecting machine learning and its application, using R! If you are familiar with R and some machine learning concepts, the course itself would not be that challenging. However, you need to submit a small group paper using machine learning for the final project.	1
2021 Fall	MLD 304: Science of Behavior Change	Rogers,Todd	Prof is very knowledge and entertaining. A lot of real life applications, perhaps one the most applied course I have taken at Harvard. Also gives you the opportunity to meet students from other schools through group projects. Work load is very manageable. The only downside is the grading is very subjective, depends on if the TA that grades you is a tough grader or not. Also, no reply to email when asking for feedback. It's a large class with a large teaching team.	1
2021 Fall	MLD 322: The Art and Adventures of Publ	Gergen,David	If you're interested in policy and want first-hand experience from someone who has influenced and built it over multiple administrations, this is the course to take!	1
2021 Fall	MLD 355: Public Narrative	Ganz,Marshall	Great course if you're interested in being able to craft a personal narrative capable of moving others towards action. Highly recommend - will last with me well after I leave Chan	2
2021 Fall	SUP 578: U.S. Healthcare Industry and R	Dafny,Leemore Sharon	Excellent course - case-based and covered a wide variety of industries. Classmates were also great - really nice to have different perspectives given some students had backgrounds in business etc. Students from Chan provided unique viewpoints	3
2021 Fall	SUP 581: Federal Health Policy Making f	Burke, Sheila	This is a really wonderful course for Harvard Chan students interested in learning more in depth about factors that affect the federal health policymaking process, particularly through taking deep dives into case studies of both failed and successful policies. The professors also provided unique insight and perspective into policymaking and regulatory processes which was very valuable. This is a great overview of federal health policy, including the budget process, and how to develop and pass health care laws and regulations. Helpful for students with little understanding of the policy making processes at the federal level. Really enjoyed this course!	3
2021 Fall	BGP 235M: Private Capital for Public Pur	Wood,David	This is a very interesting course for those with a background in the private sector or those thinking about going into the private sector. It was nice to meet students from a wide range of backgrounds who are interested in making an impact in finance. The class is lecture style/discussion based.	1
2021 Fall	MLD 632M: Transforming Public Interest O	Freeland,D Grant	It's a great course if you are thinking of going to complex organizations that will need change in several level of their structure. It's very practical and less academic.	1

Harvard Law School (HLS)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
------	-------------------------	------------	---	-----------------------

2021 Fall	HLS 2497: Public Health Law and Policy	Greenwald,Robert	One of the best courses I've taken in my MPH program - definitely take it if you have the chance. In-class discussions are richer, deeper and more thought provoking than most HSPH courses, the background readings are useful and informative, and the assignments are all interesting and serve a purpose. Because it is not a "typical" law school course but rather a seminar, the workload for a public health student is very manageable and similar to HSPH courses. Instructors and accessible, friendly, and great to learn from.	1

Harvard Medical School (HMS)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	BMI 703: Precision Medicine I: Genomic	Kohane,Zak	Interesting class to have an overview of precision Medicine. Not technical at all.	1
2021 Fall	BMI 705: Precision Medicine II: Integra	Avillach,Paul	Dr. Avillach is passionate and has a good pedagogy. As a researcher he uses his experience as examples of how to navigate in this field which I loved!	2
2021 Fall	LN 705A: Intermediate Medical Spanish	Graupera,Nina Rivera	Very helpful medical Spanish refresher for anyone in medicine. Most of the course is conversation-based, so great practice! All the TAs and professors are very helpful and giving of their time and energy.	1

Massachusetts Institute of Technology (MIT)

Term	Course Number and Title	Instructor	What would you like to tell future Harvard Chan students about this course?	Number of Evaluations
2021 Fall	MIT 6 0.047: Computational Biology	Manolis Kellis	Great intro to comp bio. But a ton of knowledge conveyed in every lecture, so be prepared to study hard.	1
2021 Fall	MIT 11 0.205: Intro Spatial Analysis & GIS	Catherine D'Ignazio; Eric Robsky Huntley	Great environment to learn about GIS and the importance of mapping data correctly. More so, the course provides insight on land as a political topic and tool which GIS uses to tell a specific narrative. If you love maps, you'll love this class! We used both ArcGIS and QGIS, so you can become comfortable using both. We also talked about who holds power when making visualizations and who's stories are being told vs ignored.	2
2021 Fall	MIT 11 0.259: Entrepreneurial Negotiation	Lawrence Susskind	Amazingly concise negotiations course that will shatter many adversarial myths about negotiations. Course learnings are more about relationship building than about negotiating	1
2021 Fall	MIT 18 0.6501: Fundamentals of Statistics	Elchanan Mossel	Good course to strengthen your foundations of statistics and propability.	1
2021 Fall	MIT HST 0.953: Collab Data Science: Medicine	Christopher Cassa/Leo Anthony Celi	This is a class that introduces you to machine learning in healthcare. In each class, we have various experts in the field of machine learning discussing about the application of artificial intelligence in the healthcare field.	2
