Mon., February 27: Listening Tour report

Dean Michelle Williams will give an update on the School-wide Listening Tour she has conducted, share what she has learned, and outline future directions, at a 2:30-4:00 PM event in Kresge Cafeteria.

Key enzyme identified for unique mode of malaria parasite replication

Scientists say that developing drugs that target this enzyme could be a potential approach in efforts to treat and prevent the spread of the deadly disease.

Climate change and health

Heat-related illness and death, increases in infectious diseases, injuries and deaths from violent storms—these are some of the serious potential human health impacts of climate change discussed at a recent Climate and Health Meeting. You can also [listen to part one](#) of our new podcast series exploring links between climate change and health.
