Research news

PODCAST: Prostate cancer genes

[Lorelei Mucci](#), associate professor of epidemiology, was a co-author of a *Nature* study that identified genes that may help determine which men are likely to have aggressive forms of prostate cancer. [Listen to podcast](#)

Health care cost-sharing

[Katherine Swartz](#), professor of health policy and economics, discusses the effects that asking patients to share more of the costs of health care has on overall health spending and the health of vulnerable people. Her findings appeared in a recent report produced by the Robert Wood Johnson Foundation. [Read report and watch web seminar](#)

Little historical evidence to support cutting global health aid during recessions

Researchers found that some countries appeared to reduce
