AIDS at 30: Hard Lessons and Hope

Thirty years after the first official reports about HIV/AIDS, we look back on the human devastation and forward to a changed social landscape. *Review* editor Madeline Drexler asked distinguished Harvard School of Public Health faculty and alumni at the forefront of

research where the epidemic has taken us and where it is headed. [Read more](#)

HSPH research in the media

Study blames 2,200 deaths on traffic emissions

"What the study says is when you are designing and evaluating (transportation) policies, you should take into account the pollution impacts, because they do matter," [Katherine von Stackelberg](#), a

research associate at the [Harvard Center for Risk Analysis](#), told *USA Today*. [Read more](#)

Stress does not increase risk of getting MS, study finds

"While we've known that stressful life events have been
