GHP Brown Bag Seminar Series

"Healthcare (Data) for All: A Roadmap for India"

In India, as around the world, there is vast excitement about the power of Big Data and Artificial Intelligence in advancing healthcare delivery. And yet, the vast majority of clinical interactions in India are captured on hand written paper records, or not at all. In September 2018, India launched the world's largest health insurance scheme, offering coverage to 500 million people. The need to monitor and evaluate services and payments for this vast enterprise will finally provide the impetus needed to jumpstart India's digital health data ecosystem. Dr. Balsari will present his team's work on proto-typing a federated, API-enabled, PHR-based model for health data exchange, that seeks to avoid the challenges of redundancy, inaccessibility and proprietorship seen with health data in the United States.

Thursday, November 15
1:05-1:50pm
GHP Conference Rm 1208
Building 1

Satchit Balsari
Assistant Professor, Emergency Medicine, Harvard Medical School / BIDMC; Fellow, FXB Center for Health and Human Rights

Light refreshments will be served
